The Undefined Terms of Geometry: Practice A

- 1) Please list the three undefined terms of Geometry.

- 2) Why do you think we call these "undefined" terms?

- 3) Imagine (or really do it if you want) you are staring into the night sky. How would you explain the three undefined terms to someone using what you see in the sky?

- 4) Why are "line segment" and "ray" not considered undefined?

- 5) How many points do you think it takes to make a line?
